

# Dialogica Series Terminal

model D 400

---

# Model D 400

---

## General specifications

■ The new Dialogica series of terminals reflects the outcome of advanced and constant research, and of the considerable know-how acquired by Coop Bilanciai in the weighing sector. Innovative terminals, designed to satisfy the new requirements of a market in constant evolution. The D 400 electronic terminal ensures maximum ease of dialogue with the operator, thanks to a backlit graphic display which is extremely simple to use and offers the facility of changing the shape and size of characters to suit different operating conditions. Rack-mounting and tabletop versions are available, both presenting similarly compact dimensions. This is a weighing terminal with a notably versatile range of use: from simple weight display to automation systems for industrial process. The product bears the EC mark in accordance with EEC directive 90/384, and is connectable to any type of load cell. Monoscale and multirange versions are available.

## Technical data

- Power supply: 85 ÷ 265 Vac, 50/60 Hz, 40W
- Operating temperature: -10°C to +40°C
- Storage temperature: -20°C to +70°C
- Analog load cell power supply: 10Vdc; min. 29 ohm
- Maximum voltage at cell input: 23mV
- 6-wire cell connection with sense lines
- Maximum external resolution: 10.000 div. OIML (for “legal” use)  
60.000 div. (for “non-legal” use)
- Maximum read rate: 100 conversions/s

Customizable display

Language selection for messages

- Analog filter 8Hz; automatically variable digital filter
  - Transmission speed programmable up to 115.200 baud
  - Automatic recognition of set options
  - Calibration with facility of “linearisation” function (max 5 points)
  - Backlit graphic display, dimensions 135x32 mm
  - 6-key alphanumeric polyester keyboard
  - Front panel protection category: IP65
  - Relative humidity: max 85% non-condensing
  - In compliance with EC Directive 73/23 (Low voltage)
  - In compliance with EC Directive 89/336 (Electromagnetic Compatibility)
  - Electromagnetic immunity to EN 45501
  - Immunity to irradiated electromagnetic field < 10 V/m
-

---

## Operating features (basic version)

- Weight display with variable height numerals (16-32 mm)
  - Language selection for messages (6 languages)
  - Weighing system self-test
  - “Auto tare” function with key, serial channel or associated input
  - “Preset tare” function, programmable using the cursor on the display
  - Resetting by means of key, serial channel or associated input
  - Transmission of weight value
  - Direct access to most frequently used functions
  - Association of most frequently used functions with I/O and serial channels

Weight display with digits from 16 to 32 mm high

## Standard equipment

- 1 x EIA RS 232 serial port
  - 1 x EIA RS 232/422/485 serial port (selectable)
  - 1 x analog output 0-10V/4-20 mA (with negative weight calculation)
  - 2 x optoisolated input
  - 2 x relay output max 110V, 200mA

## Optionals

- MPP permanent weight memory
  - 2 x expansion slot for:
    - 4 IN/4 OUT card
    - 24V BCD card
    - 5V TTL BCD card (multipoint connections)  
(2 cards of the same type can also operate together)
  - 12V power supply
  - “Angle stand” kit

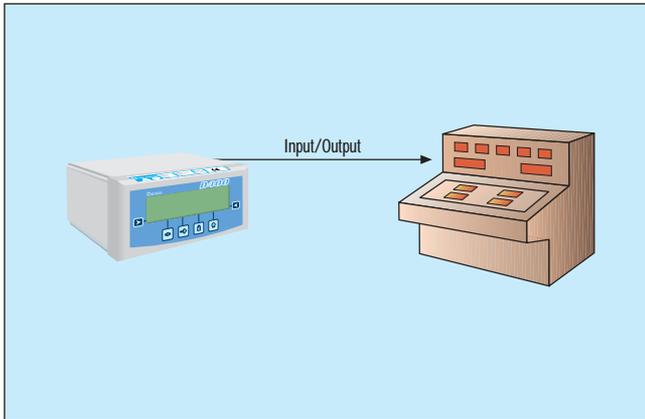

---

## Applications

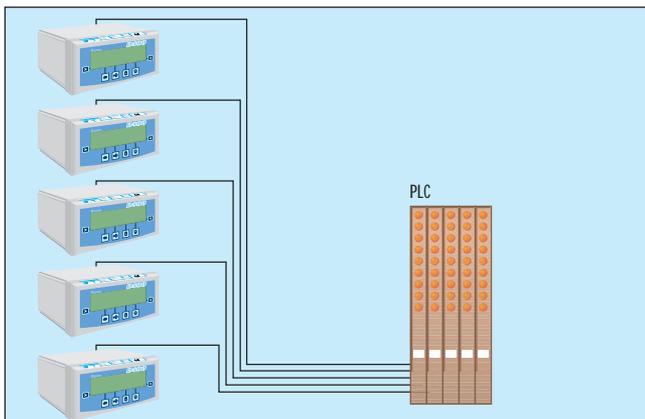

Thanks to the versatility of the D 400 terminal, it can be used in a wide range of applications, satisfying even the most complex production requirements. Some examples are shown in the figures below.

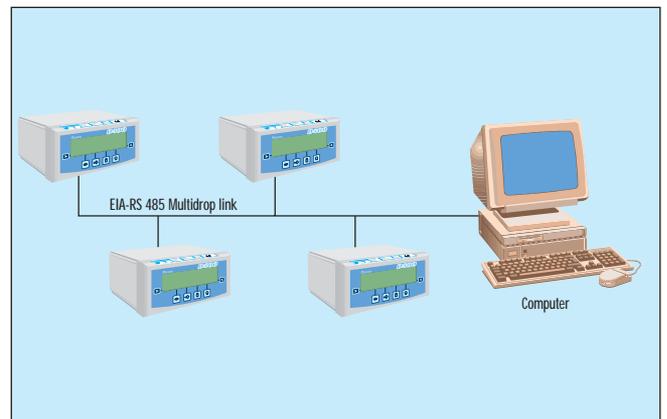

Automation by way of input/output contacts

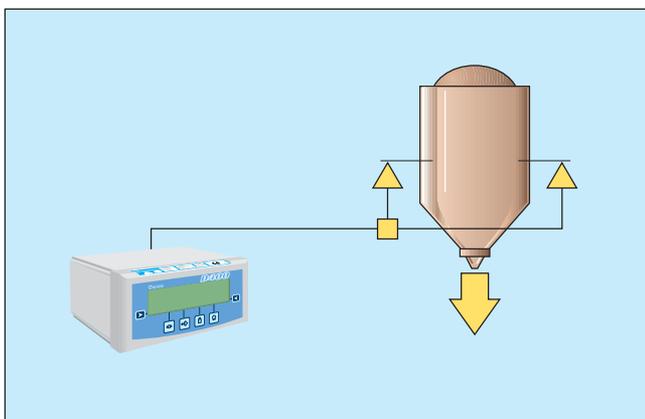

5 Volt BCD connection (including "Multipoint")

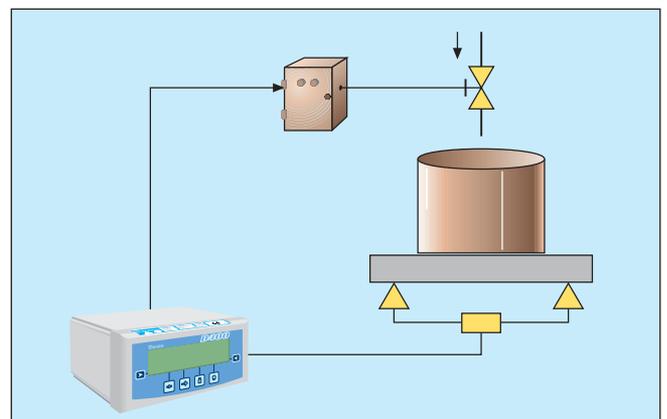

Connection with 0÷10V, 4÷20mA analog output

Networked connection

Weighing of hoppers, silos, tanks

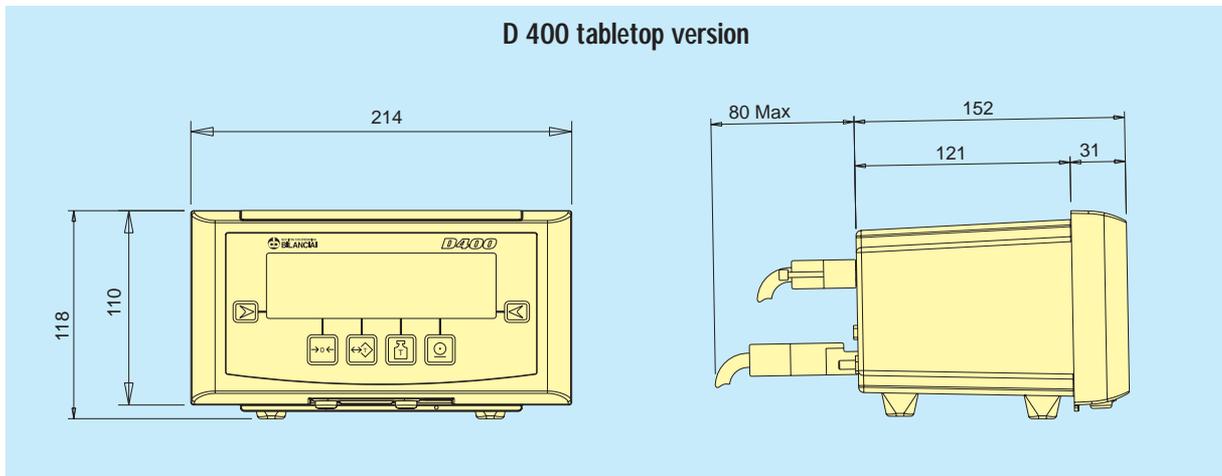

Batch weighing

 Equipment not supplied

# Model D 400

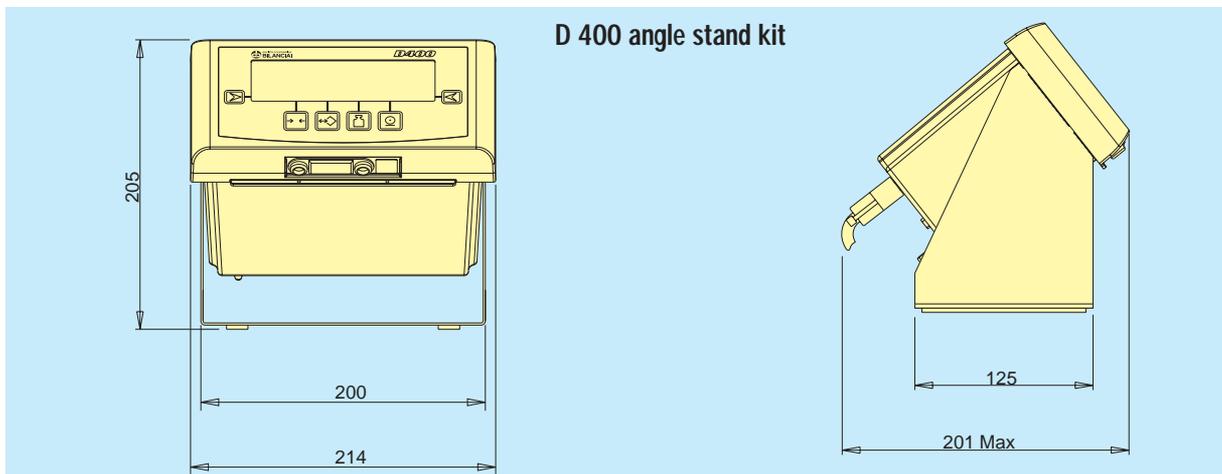

## D 400 tabletop version

## D 400 Rack-mount version

## D 400 angle stand kit
