# FLYNET

## Designed to be connected

The new generation **FLYNET50**, **FLYNET50i** and **FLYNET50ic** indicator are characterised by **high operating speed**, **intuitive use**, **easy data management** and, **sharing**, and **high connectivity performance**.

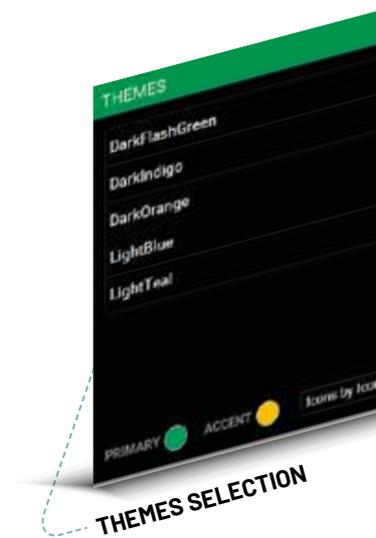

It represents the ideal solution for many applications:

- Vehicle recognition weighing, vehicle weighing with access control
- Weighing on bench or floor scales in industrial environments
- Pre-packed products control
- Manual dosing
- Waste weighing and traceability
- Part count
- Filling control

**Plus all weighing processes that require a quick and reliable data exchange with company management systems.**

## Efficient data management

- Data sharing with a SQL server  relational database for flexible data management.
- Export data in .CSV format by transferring them through FTP protocol or by saving them on a USB Flash Disk device.
- PC Windows application for remote database management.
- Possibility to archive the weighing ticket in PDF 
- Automatic data transmission by e-mail  (e.g. weighing ticket PDF, malfunction warning messages such as out-of-paper messages etc.)

# Optionals Hardware

## SERIAL OUTPUT CARD

It allows managing 2 additional serial outputs besides the two provided

- RS232, RS422, RS485 optoisolated formats
- Outputs on DSUB 9-pole connector
- Programmable Baud Rate

## INPUT/OUTPUT CARDS

- There are 8 inputs and 12 outputs for each card
- Input: with galvanic insulation Vmax 24 Vdc
- Output: Optomos Vmax 24 Vac/Vdc Imax 200 mA
- Inputs/Outputs on 25-pole DSUB
- DSUB-25-pole interface cable / terminal block

## Wi-Fi COMMUNICATION DEVICE

- External option  
(Bridge ETH/Wi-Fi)

## DIGITAL-INPUT CARD/ANALOGUE OUTPUT-INPUT

Multi-purpose optional card

- 1 analogue output 0-10V/4-20 mA
- 2 impulse count inputs Freq max 2 kHz
- 1 analogue input 0-10 V/4-20 mA
- HDMI card for external repeaters

**not available for Flynet 50 I**

## ANALOGUE SCALE INTERFACE CARD

- Internal resolution up to one million points, conversion speed up to 100 conversions/second
- Digital filters that can be customised by SW parameters

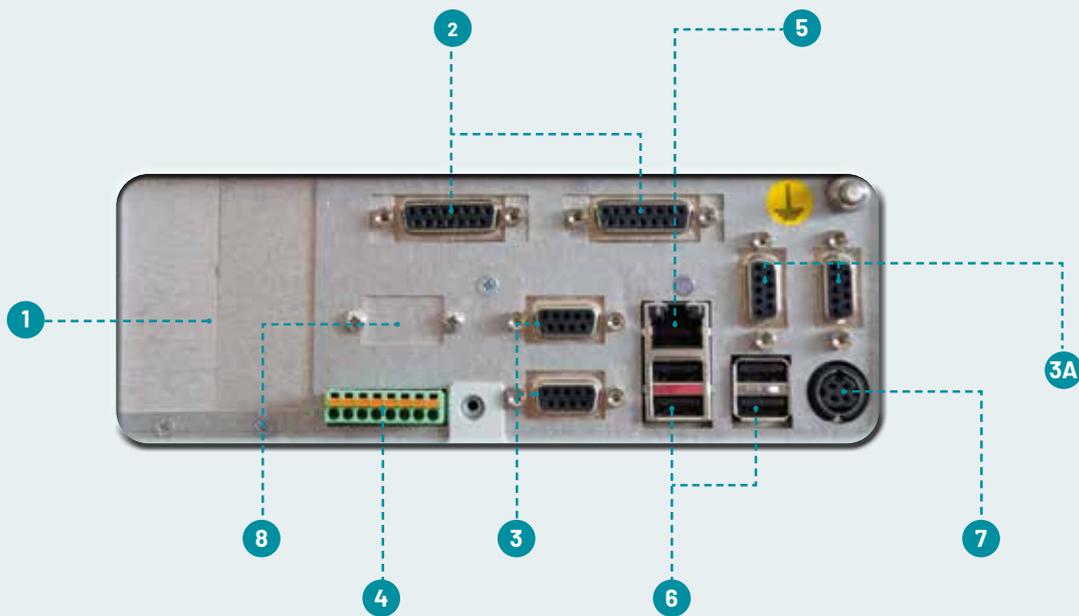

## DIGITAL

- Optoisolated RS485 interface with proprietary protocol
- Diagnostic management of digital cells (conversion, power supply, temperature, etc.)
- Automatic software correction of the eccentric load
- Cell power supply from 10 to 18 Vdc, it can be varied automatically depending on the cable length

FLYNET 50 equipped with STB Q3 printer

# FLYNET

1) SLOT FOR OPTIONAL CARDS  
- I/O CARDS  
- ANALOGUE OUTPUT

2) SCALE 1  
SCALE 2 OPTIONAL

3) NO. 3 SERIAL PORTS  
RS 232/RS422 3A)  
NO. 2 OPTIONAL SERIAL PORTS

4) NO. 2 I/O OPTOISOLATED

5) ETHERNET PORT 10/100 MBPS

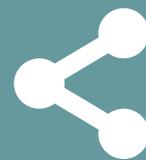

6) NO. 4 USB HOST PORTS

7) 12V POWER SUPPLY THROUGH  
EXTERNAL POWER SUPPLY UNIT

8) OPTIONAL HDMI OUTPUT  
**not available for Flynet 50 I**

## Optionals Software

- **PDF PRINTER** for the printing of the weighing ticket in electronic form
- **NETWORK PRINTER** for the printing of the weighing ticket via a company network printer
- **FISCAL MEMORY/ALIBI MEMORY (mpp)** to ensure the traceability of the fiscal weighing when the data are sent to a third party operational system
